

Digital Still Camera

PRODUCT HIGHLIGHTS

- 14.2 Megapixels + 5x optical zoom lens
- Wirelessly back up to PC – safely, securely
- 3" LCD touch screen

Stay in touch with one touch: shoot, then wirelessly save and share your shots.

The SH100's WiFi capability makes it easier than ever to wirelessly send photos to friends and family straight from your camera. Save shots directly to your PC, post them on social networking sites, even email them with just a click. A 3" touch screen makes it easy to take great shots in 14.2 Megapixel clarity. Get in group portraits by using the SH100 with your Android® powered Galaxy S™ smartphone to wirelessly view the shot, zoom in and out, and take the picture. It's advanced technology in the palm of your hand.

10MW (4320x2432), 2MW (1920x1080),
12MP (4320x2880)

Voice recording: Mono

FEATURES

Digital Image Stabilization: When shooting in low light, zooming in on a shot, or when your camera or camcorder is unsteady, Optical Image Stabilization helps eliminate blurry results. This feature stabilizes your photos by changing their path to the image sensor before they are recorded digitally. Your photos come out sharp and in-focus.

WiFi Capable: Just captured an incredible shot or video and want to share it immediately with your world? Built-in WiFi makes it easy to wirelessly upload images directly from your camera or camcorder. The push of a button sends photos to the internet and your favorite Social Networking sites, email addresses, and also saves them on your PC.

Movie recording: Record movies in the palm of your hand.

Smart Touch 3.0: Touch, drag, click: the intuitive Smart Touch 3.0 is a quick and easy way to control the many advanced functions in Samsung's new line of compact cameras. Like a smartphone touch screen, just a few touches on the large, clear LCD screen lets you control app-style icons, flip through photos and more.

Smart Auto 2.0: Captures the perfect shot by first analyzing key composition elements and then selecting from 17 different photo and 4 different movie modes. Portrait, Night Portrait, Backlight Portrait, Macro Portrait, Night, Backlight, Landscape, White, Natural Green, Blue Sky, Sunset, Macro, Macro Text (with grid), Macro Color, Tripod, Action, Fireworks.

Smart Filter 2.0: Change the mood of stills and movies with special-effects filters, such as Half Tone Dot and Old Movie.

Face Detection: Your camera does the work for you by detecting and adjusting the lighting on up to nine different faces at one time.

Beauty Shot/Self Portrait: Position yourself in the frame, with dark circles and blemishes automatically removed.

Multi Slide Show function: Lets you arrange pictures into a slide show and add music.

Smart Crop: After shooting an item – such as a building or poster – at an angle, use the Smart Crop feature to alter the image to appear as if it were shot straight on. Simply select four crop points on the image, and it automatically reappears, recropped full frame, from the desired angle.

Portrait Highlight: Samsung's smart Portrait Highlight technology makes everyone photograph looking their absolute best – automatically, every time.

Intelli-Studio: Built-in advanced editing software gives you the freedom to play, edit and share files on any PC. Intelli-Studio even starts up automatically – simply plug into any PC via the USB input.
